Chairman Tillis, Ranking Member Schiff, and Members of the Senate Judiciary Subcommittee on Intellectual Property:

On behalf of the [Coalition Against Socialized Medicine \(CASM\)](#), thank you for highlighting the importance of safeguarding intellectual property (IP) through your upcoming hearing, [The Patent Eligibility Restoration Act – Restoring Clarity, Certainty, and Predictability to the U.S. Patent System](#). Our coalition remains dedicated to defending IP rights and upholding our nation's foundational principles that drive innovation and progress. As such, we write to you today to express our support for the Patent Eligibility Restoration Act (PERA).

[PERA](#) reinforces and strengthens IP protections by bringing much-needed clarity and certainty to our current system. Historically, misguided policies and court decisions have enabled outside actors to undermine innovation and investment, stalling progress in our nation's healthcare sector. By restoring the integrity of the patent system, PERA will help renew momentum in America's innovation pipeline and ensure continued medical breakthroughs for patients.

Strong IP protections are vital to our capitalist system: without them, innovation would be stagnant as individuals and companies become less willing to invest the time, resources, and creativity required to develop groundbreaking discoveries. When innovators know their work will be protected, they are empowered to take risks that lead to new treatments, cures, and technologies.

We strongly urge you to support this critical legislation to ensure the United States remains the global leader in pharmaceutical innovation and medical advancement.

Thank you for your time and consideration.

Sincerely,

Andrew Langer
